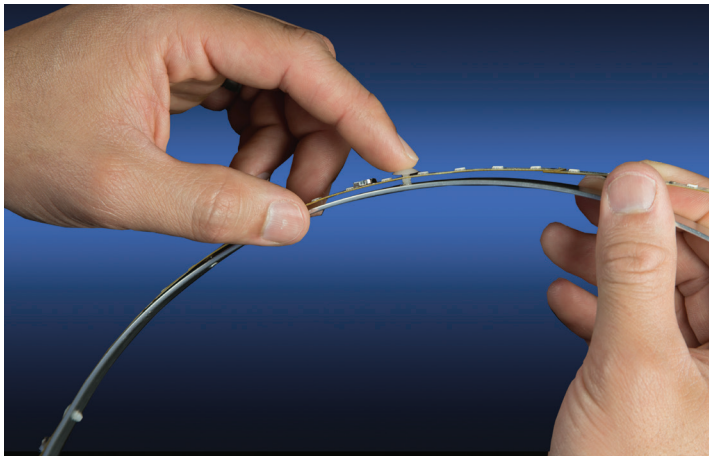
FLEXRAD® PMOUNT™

Easy Installation with Preloaded Press-In Fasteners



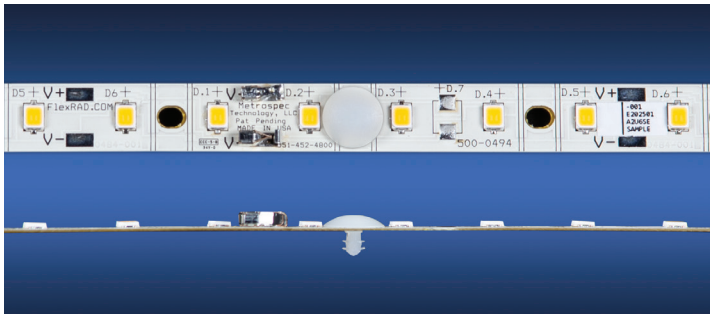
Pre-installed with connectors and fasteners, FlexRad® PMount™ snaps into any fixture assembly with the speed of a few button presses. Out of the package, PMount is completely ready to install and does not require special tools or jigs. The circuits can be shaped, curved, and trimmed to length at the time of installation. Just like all FlexRad products, PMount can be cut to length from reels that are up to hundreds of feet long.

Ultimate Design Simplicity Reduces Overall Costs

PMount breaks through all design barriers for simplicity and lower cost. Constructed in continuous long length reels or pre-assembled into pucks of various shapes, sizes and configurations, PMount can be incorporated into almost any standard FlexRad technology–Cut2Fit™, Linear360™, Wave®, Dim2Tone™, etc. Larger, more complicated shapes or larger panels can be easily designed for full light coverage with Hashtag® or other FlexRad technologies. The addition of PMount technology allows designers to take out all unnecessary system costs and eliminate the burden of jumper and wire procurement, allowing for minimal wiring and simplistic installation.

Cuttable For Precise Fit and Exceptional Performance

Speed, reliability and flexibility on the production floor have been a cornerstone in FlexRad product design.



Hundred meter reels of uniform light, that can be trimmed to almost any length, gives our customers the ability to broaden their product lines and open up major sales and marketing opportunities. The thermally conductive nature of FlexRad, combined with a very durable and permanent thermal adhesive, has been the mainstay of thousands of miles of fixture installations. PMount expands the FlexRad offering– providing pure simplicity in design, procurement and installation while still maintaining excellent thermal and light output performance.

Reduces Inventory and Increases Installation Efficiency

PMount eliminates jumpers, screws, taping, cables, sockets and in some cases, entire heat sinks—dramatically simplifying and reducing manufacturing costs. PMount, when combined with Cut2Fit, allows many lengths to be cut from the same continuous reel. Stocked and pre-configured to your base circuit design, PMount can be Configured to Order (CTO) and shipped ready to install into your fixtures, eliminating numerous production staging steps and work stations–streamlining your production lines.

APPLICATIONS	
Any Fixture	Slot
Architectural	Strip
Pendant	Sconce
Backlit	Rings

METROSPEC TECHNOLOGY®

Trusted Manufacturer of Patented FlexRad® High-Intensity LED Light Circuits

MetroSpec Technology® manufactures FlexRad® LED light sources exclusively for light fixture manufacturers needing the best efficiency, highest reliability, and most cost-effective solutions. For more than a decade, MetroSpec has been providing lighting OEMs with the finest LED technology and services to help them quickly and confidently pursue LED fixture sales.

Strong Personal Relationships

Partnerships are the center of MetroSpec's business. We collaborate with our customers, enabling them to win more projects and grow their businesses. Using our patented technology and industry expertise, we act as navigators to guide our customers through the challenges of LED light engine design.

Speed and Efficiency

Delivering customized LED light circuit technology quickly is one of our strongest attributes. We understand the urgency of orders and the need for quick delivery. It is our priority to rapidly fulfill custom orders to exact specifications by maintaining a complete inventory of critical components.

Customers Control Their Own Designs

Our customers have complete control over their designs every step of the way. Private label LED light sources are never discontinued or changed without permission, therefore eliminating costly redesigns and new testing. MetroSpec is a trusted supplier and not a competitor.

FlexRad®

Superior LED Light Circuit Technology

- High-Performing Flexible Circuits
- Reel and Trim Capability
- Superior Heat Dissipation
- Exceptional Performance at Low Cost

Strong and Stable Supplier

For more than a decade, MetroSpec has been specializing in quality LED solutions for light fixture manufacturers. Our well-established and patented FlexRad solid state lighting technology has proven to be extremely reliable in a wide range of applications. Millions of FlexRad circuits are installed worldwide and installations grow by miles every week.

Made in America

FlexRad is manufactured in Minnesota assuring direct communication and fast response. MetroSpec's lean, US-based manufacturing guarantees shorter lead times, highest quality, and lowest overall costs. With processes based on ISO and IPC standards, every FlexRad circuit is inspected and tested to ensure exceptional quality and near zero defects. Our customers are confident FlexRad is the best LED solution.
